

ABSTRACT

TITLE : DOOR4U

A portal where job seekers can find jobs.

PROBLEMS: To develop a portal where Job seekers can easily contact an extensive collection of job vacancies through job search engines, at their phase..

The Administrator can manage the whole website. The admin manages complete jobseeker section like activate, deactivate, delete, edit jobseeker's information. Admin user can view the jobseeker's applications for each job and manage complete employer section and also can manage posted jobs. Admin can send bulk emails as well can manage the skills section like add or remove skills from the website.

After registration job provider can perform actions like: Add/ Edit company's profile, Post new job vacancies edit / deactivate posted jobs. Job provider can see the list of jobseekers who has applied for the job. Job provider can search jobseekers and download the jobseeker's resume and also can send message to any job seeker

After registration job seeker can perform actions like: Search for jobs , Apply Online for desired job, Add/Edit profile information including qualification, experience, and skills. Build his resume by using CV builder functionality of the website and upload latest resume.

JOB PORTAL STAKEHOLDERS

Admin: The authorized person who handles the whole website

Job Providers: Job provider can see the list of jobseekers who has applied for the job and can download the their resume. Job provider send message to any job seeker

Job Seekers: Search jobs, post your resume and access career info and download sample resumes, Papers of various recruiters and sample cover letters etc. and can upload any useful info.

Three modules of online job portal :

Admin Modules

This module provides administrator related functionalities. The administrator manages the entire application and maintains the profiles of applicants and employers.

Dashboard: In this section, admin can briefly view the total job category, total employer, total candidates, and total job.

Job Category: In this section, admin can manage jobcategory (add/update/delete).

List of Employer: In this section, admin can view the list of employers and see the detail of individual employers.

Reg Jobseeker: In this section, admin can view the list of candidates(jobseeker) and see the detail of individual candidates(jobseeker).

Pages: In this section, admin can manage the about us and contact us pages.

Reports: In this section admin can generate a report of how many employers and candidates register between two dates.

Search: In this section, admin can search a particular employer and candidates by company name and mobile number respectively. Admin can also update his profile, change the password, and recover the password.

Employer Module

This module provides functionalities related to employers. Employers can post vacancy details and update the details as and when necessary. Employers can search through applicant resumes based on different criteria.

Jobs: In this section, an employer can post the job and manage the jobs.

Candidates List: In this section, the employer can view the list of applied candidates and send messages to selected candidates.

Candidates(Jobseeker) Modules

Home: In this section, candidates can view job which is posted by an employer and apply for those jobs.

Applied Jobs: In this section, candidates can view the response of applied jobs.

About Us: In this section, candidates can view the about us page of the website.

Contact Us: In this section, candidates can view the contact us page of the website
